Ephesus Technologies Scoops Coveted TACNY Award

Syracuse, NY. March 18, 2013. Ephesus Technologies, LLC (“Ephesus”) has won the Technology Project of the Year category in the Technology Alliance of Central New York’s (TACNY) 2013 Celebration of Technology Awards competition.

Ephesus won its category for the implementation of the nation’s brightest LED lighting system in the War Memorial Arena, located at the Oncenter in downtown Syracuse, N.Y. Completed in 2012, this project was the first single-fixture, 1000-watt equivalent LED installation at a major sports complex anywhere in the country.

The award was given at TACNY’s 14th Annual Celebration of Technology Awards Banquet, held on March 18 at the Holiday Inn on Electronics Parkway in Syracuse.

Commenting on the award, Amy Casper, CEO of Ephesus said, “It’s a great pleasure to receive such a prestigious and coveted award from TACNY. Providing a solution for the War Memorial that is both the nation’s brightest LED lighting system at an arena, and also the first single-fixture, 1000-watt equivalent LED system at a major sports complex, is something we are very proud of.”

Joe Casper, president of Ephesus, added, “We are also honored to be part of the Central New York business region. We see immense opportunities for entrepreneurs and businesses of all types and sizes located here. We will continue to develop and innovate new lighting systems and take advantage of both the great skills that are available to us, as well as the opportunities for collaboration.”

The TACNY Awards featured another seven categories, in addition to the one that Ephesus won.
